

Catalan Holidays

Specialists in Holiday Rentals

Our company

We are experts in renting out good quality private holiday homes throughout Catalonia. Our concept is simple - we maximise income for our owners through great service, competitive pricing and strong marketing. Since we started in 2006 we have consistently outperformed the competition and generated the highest possible returns for our owners.

What makes us special?

We are a Spanish registered company with a very northern European approach to business – professionalism, efficiency and attention to detail are essential to our continued growth and success. When our clients book, using our live online reservation system, they know that they will get the same great CH service whichever property they choose – before, during and after their stay.

The CH team

Our international and multilingual staff are all based full time in Catalonia and have many years combined experience in the villa rentals market. Our head office is strategically placed close to Barcelona and we have key personnel and service offices at important points throughout the region. You will always have a local agent on hand to offer help, advice and support.

Our home owner service

We work closely with our owners on a one to one basis to ensure that everything is clear from the start. We will meet with you in person to view your property and provide you with detailed information and a personalised price schedule so that you know exactly what to expect when we start working together. We will give you a contract and create a professional presentation of your home FREE OF CHARGE on our website with original photographs and a bespoke description. We will keep you fully informed of all bookings and work with you to make sure your house is ready for rental.

We offer a full management service of the property during rental or, if you prefer, we can do all the advertising, booking and administration and you do the rest. Without fail WE WILL PAY YOU IN ADVANCE of all arrivals.

Catalan Holidays

Specialists in Holiday Rentals

Our properties

We have a clearly defined specification for our holiday homes – good quality, 6 people minimum, private or community pool. These things are a must. Our clients expect a certain level of comfort and we provide a minimum inventory list to make sure everything is in place.

Our marketing

The internet is the key to modern marketing and the trend for booking holidays online continues to grow.

Our website www.CatalanHolidays.com is our main tool and we invest very heavily in our online presence. Every year over two million people visit our website and we always rank highly with the major search engines. We have a huge customer base made up of Northern European and other international clients from over 50 different countries. We email all our clients on a regular basis with CH offers, news and info.

We are pro-actively using [facebook](#) and [Twitter](#) to gain market share. To ensure we also reach our clients in their native language we have selected partner agencies in a variety of countries to exclusively represent our properties via their own online portals.

Our customers

We pride ourselves in offering each and every one of our guests an excellent service and we have many repeat customers who will testify to our strengths. We have analysed our typical guest profile and the majority are professional level nuclear or extended families with children. We specifically tailor our marketing to target this type of client and of course all promotion is FREE OF CHARGE for our owners.
